

# Did you know the Shenandoah Valley SWCD has geotextile fabric and soil probes for sale?

Non-woven geotextile fabric is suitable for use on conservation projects including but not limited to: water trough installation, heavy use areas, walkways and crossings.

- Contact the District to confirm staff are available to cut the amount of fabric you are requesting.
- Fabric is 15 ft wide

**Price: Contact the District for the current price per linear foot.**

Soil probes are a useful tool to have if you need to collect your own soil samples for your operation. These soil probes can be used to collect soil samples to update your Nutrient Management Plan or collect your own Pre-sidedress Nitrate Testing (PSNT) samples.

The District has powder coated 40" one-piece step soil probes for sale.

**Price: \$110.00, plus tax**

To purchase geotextile fabric or a soil probe contact the District office at (540) 534-3105

Payment is preferred at time of pick up (cash, check or credit card is accepted)
